

505 K1
Claim 44 - The method of claim 43 including using serial data transmissions between the facsimile machine and the personal computer.

Claim 45 - The method of claim 43 including using parallel data transmissions between the facsimile machine and the personal computer.

Claim 46 - The method of claim 43 including using analog data transmissions between the facsimile machine and the personal computer.

E-Sub G8
Claim 47 - The method of claim 43 including using analog data transmissions, or digital serial, or parallel signal subsets thereof, between the facsimile machine and the personal computer.

Con'd
Sub F.1
Claim 48 - The method of claim 43 further comprising optically recognizing the scanned data and converting the scanned data into character codes.

Sub G9
Claim 49 - The use of a facsimile machine connected to a computer, isolated from the active telephone line, and providing for the direct transfer of scanned image signals to the computer, without interruption or modification during transmission.

Claim 50 - The use of a facsimile machine connected to a computer, isolated from the active telephone line, and providing for the direct transfer of signals from the computer, to be printed by the facsimile machine, without interruption or modification during transmission.

REMARKS

Early examination on the merits of this application and allowance are earnestly solicited.

A check in the amount of \$88.00 is enclosed to cover the charges for the eight new claims.

Respectfully submitted,

Marvin J. Nachman,
